Founders' Day Celebration

DPS, Shaheedpath celebrated its 10th Founder's Day on 10th April 2023. A special assembly was organised to commemorate its legacy and success with enthusiasm and exuberance. We remembered our founder members and celebrated what they envisioned 10 years ago. Our esteemed CEO, Mrs Swati Pal expressed her gratitude towards the staff and felicitated them who had been a part of the school from its foundation. The Principal, Mrs Manju Lakhanpal also addressed the gathering and congratulated everyone.

HEALTHON

DPS Shaheedpath recently participated in the "Healthon" organized by Dainik Jagran I-Next at Janeshwar Mishra Park. The event was graced by the presence of Mr. Jitin Prasad, the cabinet Minister of PWD, who was the chief guest of the event and honourable principal ma'am. All the faculty members and students geared up for the categories of events with a distance of 11km, 5km and 2km in the shortest possible time.

Drawing Styles

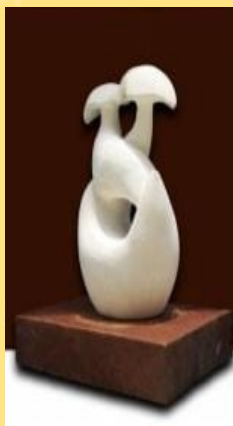

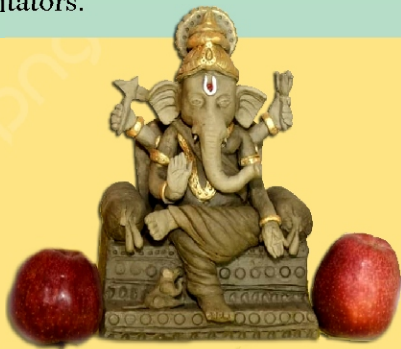

There are several methods to make your artwork look unique. Our students at DPS, Shaheedpath try different type of art style from their own imagination and make it unique. Anime drawing is one of the styles of animation characterized by colourful graphics depicting vibrant characters.

NEWSLETTER

Clay Modelling

The most easily recognized form of sculpting is clay modeling, that is, the creation of a 3-dimensional piece of art typically using pottery clay. Our students use their own creativity to mould the clay and give some explicit figures under the guidance of respective felicitators.

Surprising Science Facts

🧐 **The invisible roles of color**

We all know that nature is full of beautiful colors, amazing patterns, and incredible forms of camouflage – but what other functions do colors serve when they aren't helping an animal hide or show off? In reptiles, and other ectothermic (“cold-blooded”) animals, certain colors can actually help them warm up in cooler temperatures.

🧐 **Bats and diseases, what's the deal?**

A lot of people think bats carry a lot of diseases, but is it true? The answer might surprise you.

Bats, like humans, are mammals. This means it's easy for diseases to pass between us since we're pretty similar. Bats nurse their young, have fur (yes, your hair is fur), and can maintain a body temperature warmer than their surrounding environment.

🧐 **Snowy owls don't need fuzzy slippers**

Snowy owls don't have to put on snow pants or fuzzy slippers to stay warm even in the winter winds in cold Arctic regions because their legs and feet are covered with feathers.

🧐 **Mighty mites!**

Mites are the first animal space hitchhikers. A colony of the mold mite (Tyrophagus) has been found inside the International Space station. On Earth, this mite is common in houses and stored food.

🧐 **It's impossible to burp in space**

In space, there is no gravity to pull things straight down, so the gas and liquids in the astronauts' stomachs don't separate. This means the gas can't come back up to create a burp!
