TREES

April

Trees are no less than GOD to us in any other ways. A small seed becomes a big tree, Gives shade in summers, the leaves of trees fall down to provide us more sunlight and the winters. They provide shelter to the birds ,animals and human beings too. Flowers on trees are a joy to be seen. Their fruits satisfy our hunger. Many trees have medicinal values also. Trees are the largest and longest living things on earth and they live much longer than animals. Trees help in controlling temperature of the environment . The trees are great donors, they keep giving their services whether in the form of fruits , flowers, medicines, herbs or shelter selflessly and we the gainers. gain non ending things from them for our greed of one or the other things.
