Date 18/04/2026

Delhi Public School, Mohali, transformed its campus into a dynamic hub of experiential learning on April 18, 2026, with 'Skill Saturday', a day exclusively conceptualized to equip students with practical acumen and life-oriented competencies.

The initiative featured a diverse spectrum of hands-on activities meticulously designed to foster creativity, critical thinking, and collaborative spirit. To cultivate mind-body synergy, students engaged in an invigorating yoga session and spirited sports activities that promoted discipline, endurance, and teamwork.

The intellectual and creative domains were activated through a range of application-based engagements: logo designing, fireless cooking, ad creation, blueprint building, 'Idea to Innovate', and 'Picture to Story'. From conceptualizing compelling advertisements and drafting structural solutions to translating visual prompts in narratives and innovating real-world solutions, each activity challenged students to think, create, and apply.

Every endeavour was curated with a singular vision: to bridge theoretical knowledge with practical utility and to nurture problem-solving, ingenuity, and co-working abilities. The day highlighted the school's commitment to interdisciplinary learning beyond textbooks, preparing agile, innovative, and well-rounded individuals for challenges beyond the classroom.

In essence, Skill Saturday exemplified learning by doing — a harmonious blend of art, intellect, and wellness that left students enriched, empowered, and future-ready.
