Roll no. 21-40:

Working Model of angles:

This homework includes the preparation of a working model of angles to help students understand the concept of angles in a fun and practical way.

Students are encouraged to use simple materials like cardboard, paper fasteners, and markers to create movable angle arms. Submit your model along with a short explanation of what you've learned.

Uses of the Working Model:

It visually demonstrates different types of angles like acute, obtuse, right, straight, and reflex angles.

Helps in identifying and measuring angles using a protractor or rotating arms.

Makes it easier to understand angle formation in real-life objects such as clocks, fans, and doors.

SCIENCE

Arunachal Pradesh and Meghalaya are biodiversity hotspots, with a rich variety of flora and fauna. These states have a large percentage of India's forest cover, supporting a diverse range of plant and animal species.

Both these states are home to numerous indigenous tribes, each with its own unique cultural practices and traditions. These tribes are known for their vibrant festivals, colorful costumes, intricate handicrafts, and delicious cuisines.

It's time to explore more about them and hence here are exciting projects that would help you do so!

Roll 1-15

Prepare an attractive "Menu Card" based on the traditional and authentic cuisine of Arunachal Pradesh and Meghalaya. You will provide all relevant information (ingredients, history, nutritional value etc.) about the food items (atleast 5) along with its picture.

Roll 16-30

Prepare a "Herbarium File" with any five traditional plants of Arunachal Pradesh and Meghalaya. Include their local names, root and leaf- venation type, medicinal importance if any, etc.

Roll 31 and above

Make a "Travel Brochure" on any three wildlife sanctuaries or national parks of Arunachal Pradesh or Meghalaya depicting its biodiversity.
