“LEARN, ACHIEVE, INSPIRE”

The Learning Light : September-November Edition

“Lighting the Path to Learning and Beyond.”

## The Glimpse Within

This edition invites you to step into the world of our school, where curiosity, teamwork, and imagination come together to create something special. It reflects the shared energy, dedication, and creativity that make our community unique.

Every moment, big or small, contributes to the story we are building together — a story of growth, learning, and support. The challenges we face, the ideas we explore, and the successes we celebrate are all part of this collective journey.

Let's cherish our shared experiences, continue to grow together, and look ahead with excitement, confidence, and hope for the future.

Keep inspiring, keep evolving, keep shining!

## A Lesson to Imbibe: The Transforming Power of Education

Education is the greatest gift we can offer a child, a light that guides, empowers, and transforms. True education goes beyond textbooks, nurturing values, building character, and inspiring purpose. It teaches children to think deeply, dream boldly, and act with kindness. At our school, we believe learning is not just about preparing for the future, but about shaping the present with integrity, curiosity, and compassion. Every activity, every lesson, every smile here is a step towards creating confident learners and responsible citizens, because transformation begins the moment education touches the heart.

## Edition's Highlights

- Campus Currents
- Winning Moves
- Tapestry of Expression
- Young minds in action

## Wellness Tips

“Healthy habits today, happy minds tomorrow!”

## Daily Reminder

“Words have power, use them wisely.”

"Expressing Earth's Beauty Through Art"

## Punctual Students

"Hats off to our students for 100% attendance! Your dedication and punctuality are the stepping stones to success."

## Tapestry of Expression

As a parent choosing the right school for one's child is among the most important decisions we make. My experience with school has been nothing short of exceptional. I am truly impressed by the school's nurturing environment and commitment to academic excellence. The faculty is not only highly qualified but also deeply dedicated to the holistic development of each student. Thanks to the school's balanced approach to education, my child has grown remarkably both intellectually and emotionally.

From well-structured lessons to engaging extracurricular activities, every aspect of Sharda International School reflects a deep commitment to holistic education. We are proud to be part of a community that values integrity, innovation, and lifelong learning.

The curriculum is thoughtfully designed, blending rigorous academics with co-curricular programs that foster creativity, leadership, and teamwork. I especially appreciate the school's emphasis on values, discipline, and digital learning - skills that are essential in today's world.

The school's focus on experiential learning and open communication between teachers and parents have made a lasting impact. We deeply value the way school celebrates each child's individuality. I wholeheartedly recommend school to any parent seeking a well-rounded future ready education for their child.

We are grateful to be part of a community that truly puts children first. Thank you for shaping Sharanya and Yash into thoughtful, capable, and joyful learners.

Warm regards,  
Sharanya and Yash's Parent

### Strong Minds, Happy Hearts

A strong mind and a happy heart are a beautiful kind of power—steady, bright, and quietly unstoppable. A strong mind helps us think clearly, stay grounded, and rise above doubt, while a happy heart reminds us to savor the small joys and keep love at the center of our days. When wisdom and warmth work together, challenges feel lighter and opportunities feel closer. With resilience in our thoughts and kindness in our spirit, we move through life with confidence, gratitude, and a sense of peace that inspires everyone around us.

### Try out these brain-teasers

I travel the world  
while staying still.  
I'm touched by  
many, but held by  
none.  
What am I?

Answer: A map.

The more of me you  
take, the more I leave  
behind.

Answer: Footsteps

### Eco Science: Caring for our Planet

Eco-science teaches us that our planet is a precious, interconnected system that provides all life's essentials, from air to water. Human activities like pollution and deforestation are harming this delicate balance, threatening wildlife and future generations. To protect our planet, we must act by reducing waste, conserving water and energy, and making eco-friendly choices like using reusable items, recycling, planting trees, and switching to renewable energy. Every small step taken by individuals contributes to a healthier, more sustainable world for all.
