English Language WORKSHEET – 4

Ex. The Lost Wallet

One Sunday evening, Aarav went to the market with his mother to buy some groceries. The market was crowded with people buying fruits, vegetables, toys, and clothes. While his mother was busy talking to the shopkeeper, Aarav noticed an old man looking worried. The man was searching everywhere and checking his pockets again and again.

Aarav politely asked him what had happened. The old man said that he had lost his wallet somewhere in the market. It contained some money and important papers. Aarav immediately decided to help him. He carefully looked around the nearby shops and soon found a brown wallet lying near a fruit stall.

Aarav picked it up and checked the name written on an identity card inside it. It belonged to the same old man. Aarav quickly returned the wallet to him. The old man was overjoyed and thanked Aarav for his honesty and kindness. Aarav's mother felt proud of her son. The old man blessed Aarav and said that honest people make the world a better place.

Questions

1. Where did Aarav go with his mother?
2. What things were people buying in the market?
3. Why was the old man looking worried?
4. What did the old man lose?

9. A construction project requires 105,000 bricks. If 5,000 bricks are used each day, how many days will it take to complete the work?
10. A train can carry 4,800 passengers in total. If each compartment holds 400 passengers, how many compartments are there?

1. Ten lakh = _____ million
2. 1 crore = _____ million
3. 1 million = _____ thousands
4. 10 thousand = _____ hundred
5. 10 ten lakhs = _____ crore
6. 40 lakhs = _____ millions
7. _____ lakh = one million
8. Crores in 47,52,39,186 are _____
9. Place value and face value of a digit is equal at _____ place.
10. Successor of 10,00,000 is _____
11. 1 + greatest 6-digit number is _____
12. The place to the left of lakh is read as _____
13. In the place value chart, the place on the left is _____ times greater than the place immediately to its right.
14. The lakhs place is _____ times smaller than the crores place.
15. Predecessor of 76,03,215 is _____
16. Write the number you get when 1 is subtracted from the smallest 7-digit number.

17. Form the smallest 7-digit number using the digits 0, 5, 7, 6, 8, 3 and 2

18. Form an 8-digit number using the digits 0, 7, 8, 3, 1, 4, 6 and 5 which is as close as possible to the largest 7-digit number.

Place value and Face value and number system worksheet

1. Find the place value and face value of the underlined number:
 - a. 54890
 - b. 235673
 - c. 790245
 - d. 617644
2. Find the difference of the place value and face value of the underlined number:
 - a. 568394
 - b. 541990
 - c. 650000
3. Write the predecessor of the largest six number digit number: _____
4. Write the predecessor of the smallest five digit number: _____
5. Write the successor of the largest eight digit number: _____
6. Write the successor of the smallest seven digit number: _____
7. How many zeros present in one crore? _____

8. Write the number names in Indian number system and International number system.

	Indian number system	International Number system
14559786		
54886090		
300045782		

9. Write the numerals of each number names as per the number system:

Eighty three million seven hundred eight thousand six hundred forty two	
Six crores fifty five lacs ninety seven thousand five hundred three
