Diwali Celebrations – Non-fire Cooking

Diwali festivities were celebrated with great enthusiasm at SNS Little Learner's Hub. As part of the celebrations, a Non-Fire Cooking Activity was organised for the students of Class Playgroup, providing them with a fun-filled and engaging hands-on learning experience.

The activity enabled the little learners to prepare simple and delicious dishes without using fire while exploring the world through their five senses. They used their eyes to observe the vibrant colours, nose to smell fresh ingredients, ears to listen to the sounds of mixing, hands to feel different textures, and tongue to savour the delightful flavours. Students proudly carried the sweets home to enjoy the treat with their family. Such activities foster creativity, enhance fine motor skills, and encourage teamwork and confidence among young learners. The children also developed essential life skills such as mixing, spreading, arranging, and serving food.

It was indeed a delightful learning experience filled with joy, laughter, creativity, and delicious treats, making the Diwali celebrations even more memorable!
