Word of the day

Relegation

The word relegation refers to the action of assigning someone or something to an inferior rank or position. It is popularly used in sports, where it corresponds to the transfer of a sports team or player to a lower division of the league.

In use from the 1580s, the word has seen a steady increase in usage over time. In fact, the usage has multiplied manifold since the 1800s and has peaked since the second half of the 20th Century – probably due to its association with sports.

The root word of relegation is *relegare*, which comes from the Latin word *relegatus* or *relegare*. The word *relegare* can be broken down into *re* for "back" and *legare* for "send with a commission". Initially used to mean "to banish or to send into exile", the meaning "to place in a position of inferiority" was recorded from 1790.

Usage: English Premier League clubs that are near the bottom of the points table are against relegation and promotion for the next season if the current campaign cannot be completed.

Activity: Use the word of the day in a sentence of your own.
