

IIT Madras launches international master's course on Water Security and Global Change

By Education Desk: April 18, 2024

IIT Madras has launched a new joint Master's Programme (JMP) on 'Water Security and Global Change' in partnership with two German universities – RWTH Aachen (RWTH), and TU Dresden (TUD) and in association with AIT, Bangkok, and UNU-FLORES. Indian as well as international students with specified engineering backgrounds are eligible to apply for this master's programme.

Students should remember that medical insurance is inclusive with IITM fees, students need to acquire insurance for the proposed period of stay in Germany. However, accommodation, living and traveling costs are not included in the fees. Students can avail scholarship opportunities available for the same. Internships and Master thesis will be conducted closely with companies, governmental agencies, and NGOs. The programme will enable the mobility of enrolled students among the three universities, the institute stated in an official press release.

Students will commence the academic year at IIT Madras and spend at least one semester at TUD and RWTH, with the flexibility to execute their Master's thesis at the University of their choice. This programme will provide students with interdisciplinary research and studies, empowering them with the skills to address water security challenges and climate adaptation realms in a global environment, claimed the release.
